Feasibility Study

- **Executive Summary:**

In this project, the problem of distance learning will be solved through the website.

Increase students' knowledge to learn .

Save money for students to learn.

- **Defined business problem or opportunity:**

Servers may be breakdown.

Not knowing how to use the website properly .

- **Requirements and purpose of the study:**

The purpose of the feasibility study is to find the best way to solve our problem with less cost and simple tools so we can save money and install our technology easily.

**And this will make our project more successful,
Shows the required investments and the expected return and the influence of the project on our life.**

- Assumptions Used in the Study:

It can be used on all devices such as (computer - laptop - smart phone – smart TV).

- Audience Impacted:

Our website will save money, time and convenience for students.

- Financial Obligations :

Cabling and connectors: 2,500\$

Installing devices and servers 1000\$ for every device and server.

Network installation: 1,500\$

- Recommended Action:

Upon final approval, a project charter will be drafted and the team assembled. A plan of action will be created for the implementation.

As soon as the website is finished, the website will be configured and any problems we encounter will be resolved.

If the project works fine so we can publish it hence we succeed and brought money

Else

Then we can see if we should review the feasibility again or we should abandon the project.
